Scan

Snap a photo of the 1007. AI fills in every box and flags any it isn't sure of. A buyer confirms before anything counts.

Price

Loan value worked line by line on the USDA schedule: SMK, OK, damage, FM, splits, LSK and excess moisture.

Ask

"What's our average SMK from Hartley Farms this week?" Plain-English answers from your own loads.

One point. Real money.

\$106.72

That's one point of SMK on a 20-ton Runner load at the 2026 loan rate of \$5.336 per point per ton. Peanut Buyer Desk shows the math on every line. It also flags any certificate where the printed value doesn't match.

How it works

- 1

Scan or type it in
Photo, scan or PDF of the FSA-1007. Boxes the AI isn't sure of are highlighted.
- 2

Buyer reviews
The scan sits beside the form. Check the flagged boxes, then mark the load reviewed.
- 3

Settle and report
Loan value, contract premium and NPB assessment. Export to Excel, or just ask.

Load 26-04117 · Runner · Seg 1		SAMPLE DATA
SMK 73 + SS 3 = 76% × \$5.336		\$405.54
Other kernels 2% × \$1.40		\$2.80
Damage, FM, split discounts		-\$0.00
Net value per ton excl. LSK		\$408.34
Kernels 30,427 lb ÷ 2000 × \$408.34		\$6,212.28
LSK 643 lb × \$0.07		\$45.01
Loan value		\$6,257.29
NPB assessment \$3.55/net ton		-\$55.15
Net before other deductions		\$6,202.14
